## **Protest letter against medical restriction**

25.03.2019

European Hang Glider and Paraglider Union EHPU cover under umbrella 19 european states with more than 100.000 registered pilots. Primary task of union is protection our members (pilots) . Our Union dispose of the database accidents since year 2012.

In all that time we didn't record no any accident happend due to medical reasons like Diabetes Melittus cat. I and cat. II . In all union our pilots need just simple medical certificate to aply flying licence. Is the same like for driving license. For driving license chronic disease (like Diabetes Melittus cat. I and cat. II for exemple) no need medical restriction. Each one of use drive car, fly paraglider or hang glider is the same. All we do on self responsibility. We think that your restriction is too big for our pilot in your country. Please to reduce medical restriction in the future to get fly licence of paraglider and hang glider like we have in all other country.

Thank you in advance for good cooperation and understanding our problem.
